Andrew Herring, MD, Medical Director, Bridge Clinic
Temisan Amoruwa, Vice President of Patient Care Services, Ambulatory

DATE: **May 11, 2026**

SUBJECT: **Highland Bridge Clinic is Moving to E1**

Effective Monday, May 11th the Highland Bridge Clinic has relocated to E1, from its original location in OA-1. We are grateful to the AHS Engineering, Security, IS/Epic, supporting departments and our labor partners for their efforts to limit the impact of this move on patients and employees.

What To Know:

- This relocation allows the Bridge to continue to deliver high quality, low-barrier access to care to the AHS community in a **space that is more suitable for safe, high volume, drop-in medical care.**
- A volunteer will be stationed outside the former Bridge Clinic location in OA-1 to help redirect patients to the new location in E1.
- There is no impact on Bridge Clinic hours of operations. Clinic hours remain the same:
M-F, 8:30am-5pm, with the last drop-in time at 4:30pm.
- The **Road to Recovery SUD treatment program remains located in OA-1.**

What You Can Do:

- Direct patients to continue to drop-in to E1 or call the SUN access line (510-545-2765) for same-day access to Bridge providers.
