

## What to Expect At Your Wound Care Center

Your first visit will include a meeting with your clinical team who will review your wound and ask questions about your personal and family history.

You may need additional tests such as blood tests, x-rays or ultrasound tests to help identify the right path to heal your wound.

1. Your clinical team will create a personal plan of care.
2. Digital photos and precise measurements of your wound will be taken.
3. Your healing progress will be continuously monitored.
4. Your wound will be analyzed with clinical evidence gathered from healing more than 4 million wounds.
5. Your individual treatments will be adjusted based on your progress.
6. Charts and photos that show how your wound is healing will be provided.

# Healing Happens Here

We are so glad you found us. You do not have to let a non-healing wound limit your quality of life. We are experts at treating hard-to-heal wounds and are dedicated to helping you heal so that you can get back to your life, wound free. Please read through these commonly asked questions.

## How Often Will I Visit The Wound Care Center®?

Your personal plan of care will require frequent and consistent visits. Your care team will schedule your visits and may make adjustments based on the wound's healing progress.

## What Treatment Will I Receive?

Our specialty-trained doctors, nurses and technicians provide world-class wound care treatments to specifically treat your wound. Some of those treatments may include:

- Advanced dressings
- Compression therapy
- Debridement
- Hyperbaric oxygen therapy (HBOT)
- Negative pressure wound therapy
- Pressure relief and off-loading
- Tissue-based therapies

## Will My Visits To The Wound Care Center Be Covered By Medicare Or My Insurance?

Many treatments provided by your Wound Care Center are covered by Medicare and other healthcare insurance providers. We will bill your plan based on the information you provide. Please call your Center if you have questions about the types of bills you may receive.

## When Should I Call My Doctor About My Wound?

It is important to call your doctor right away if you experience any of the following signs of infection:

- A rapid increase in pain, swelling and/or redness
- Bad odor or excessive drainage from your wound
- Nausea, vomiting, chills

Infections can occur at any stage, even in new wounds. If left untreated, infections create risk of hospitalization or amputation, and may be life threatening. Seek care right away any time your wound is not healing as expected or appears to worsen.
